## Why 9:am?

At 9:am, the sun has already risen, and the day is well underway. It marks the transition from the tranquil early morning hours to the vibrant and active part of the day.

**"it's the perfect time to have your first cup of freshly brewed coffee for that"**

## do you know?

Research has suggested that it's better to drink your first cup of coffee 90 minutes or more than after you have woken up, to maximize the benefit of the caffeine boost, and to avoid crashing and feeling sluggish later in the day.

## it's mathematically special

Aside from being the highest single digit numeral in the decimal system, 9 also is the only number where the result of it's multiplication can eventually be reduced back to 9.

**examples :**

$$9 \times 3 = 27, 2+7 = 9$$

$$9 \times 11 = 99, 9+9 = 18, 1+8 = 9$$

# Early Bird Combos

08 AM - 10 AM

## Sandwich Breakfast With Tea

Breakfast with half boiled egg sandwich  
and a cup of hot tea

28
